I am finding my 62 is starting hard when cold I kick it thru 4 times full choke twist throttle 4 times turn choke off turn ignition on it sputters then I have to kick it thru 2 times throttle open acts like its flooded and it might start when its warm/hot its either going to fire on first kick or again roll throttle open 2 times my problem is if I lean it out one or two clicks it wants to pop ...Tire Pressure . it will tell you your pressure in and around the door when you open it or on the inside of the fuel cap & also mention in your service manual I don;t use an oil gauge on my Pan, and I don;t intend to start. But saying that the return of oil to the tank is an adequate way of checking, for someone who is concerned about their oil pressure, strikes me as strange.
