

Download Apache Openjpa User Guide

OpenJPA is Apache's implementation of Sun's Java Persistence API (JPA) specification for the transparent persistence of Java objects. This document provides an overview of the JPA standard and technical details on the use of OpenJPA. Apache OpenJPA is released under the Apache Software License Version 2.0. Apache OpenJPA includes the persistence and orm schemas from the JPA specifications and elects to include this software in this distribution under the CDDL license. OpenJPA is Apache's implementation of Sun's Java Persistence 2.0 API (JSR-317 JPA 2.0) specification for the transparent persistence of Java objects. Apache OpenJPA 2.4 User's Guide vii 14. Conclusion 198
