Apple's 32-bit EFI implementation on late 2006 Macs makes it tricky to get 64-bit Linux distros installed. Tricky, but not impossible...I would like to point something out about your posting today with regards to shutdown, sleep, or leaving a mac running. In my experience as a systems administrator over the past 15 years, and with having to regularly service and maintain thousands of machines, I have made and discussed with others the following observations.
