On Demand, Optimal positioning the for non-surgical and surgical client with neuromuscular scoliosis. Medical Terminology, ATP/SMS Prep Content, Intermediate Level
Limited mobility can lead to skin problems. Some older adults become frail or ill to the point where they can't move their bodies enough. When that happens, the skin touching their bed or chair can get irritated from constant pressure.
Long-distance running, or endurance running, is a form of continuous running over distances of at least eight kilometres (5 miles). Physiologically, it is largely aerobic in nature and requires stamina as well as mental strength.
