Computer science is the study of processes that interact with data and that can be represented as data in the form of programs. It enables the use of algorithms to manipulate, store, and communicate digital information. A computer scientist studies the theory of computation and the practice of designing software systems. Its fields can be divided into theoretical and practical disciplines. The Social Sciences AS degree lays the foundation for a bachelor of science degree in anthropology, economics, political science, psychology, and sociology. The program includes one year of coursework in the same foreign language. The Social Sciences program is designed to provide transfer paths that will match the requirements of senior institutions (four-year colleges and universities) ...NEW Master's in Information Security and Digital Forensics B.S.
