Look for a dongle, probably white, attached to the parallel port of one of the computers. If you have this dongle, along with a receipt for the pallet of stuff you purchased then you have a legal seat of Mastercam.

Unfortunately, you will get absolutely no support from Mastercam or its resellers ...In the hands of a well-trained programmer Mastercam is a very powerful tool capable of helping your company reach maximum productivity. Our experience shows us companies who make an investment in training are the companies positioned best in their markets. ShopWare is dedicated to providing best-in-class technical support. Having local support behind your CAM system is critical to success. That's why Shopware has a team of applications engineers, post writers and trainers to get the most out of your Mastercam investment right in your back yard. MasterCam 9.1 works well on my XP systems, even with the SP 3 addition that came out lately. I am running 16 seats at work and one at home, no problems or slow activity.
