

Download Multiple Primary Cancers

Multiple primary versions can arise by themselves, experts say. Researchers look into past treatments, environments and genetics as the culprits. Occult Primary (see NCCN on occult) Occult primary tumors are defined as histologically proven metastatic malignant tumors whose primary site cannot be identified during pretreatment evaluation. All prices are NET prices. VAT will be added later in the checkout. Background BRAF V600 mutations occur in various nonmelanoma cancers. We undertook a histology-independent phase 2 “basket” study of vemurafenib in BRAF V600 mutation–positive nonmelanoma cancers.
