George Kobulia Met with Rossen Jeliaskov, Minister of Transport, Information Technology and Communication of Bulgaria – 04.04.2019

A circular economy (often referred to simply as "circularity") is an economic system aimed at minimising waste and making the most of resources. This regenerative approach is in contrast to the traditional linear economy, which has a 'take, make, dispose' model of production. In a circular system resource input and waste, emission, and energy leakage are minimized by slowing, closing, and ...

Construction and Demolition (C&D) materials consist of the debris generated during the construction, renovation and demolition of buildings, roads, and bridges. EPA promotes a Sustainable Materials Management (SMM) approach that identifies certain C&D materials as commodities that can be used in new ...

The name sustainability is derived from the Latin *sustinere* (tenere, to hold; sub, under). Sustain can mean "maintain", "support", or "endure". Since the 1980s sustainability has been used more in the sense of human sustainability on planet Earth and this has resulted in the most widely quoted definition of sustainability as a part of the concept sustainable development, that of the Brundtland ...
